Hi everyone,

I`m playing Renegade for some time now and I`ll like to know what does it take to run a Renegade Server?

At the moment I own a dedicated server located at SharkTech (Chicago,IL) DataCenter with unlimited bandwidth.

Server uptime is about 200 days with following specifications:

AMD 4200+ X2 , 2GB RAM, 70GB free space on HDD.

O/S: FreeBSD sigma.oshells.eu 6.2-RELEASE-p5 FreeBSD 6.2-RELEASE-p5 #0: Sun Jun 10 20:19:27 UTC 2007

Would someone be interested in running (admin) a Server if the above specs are good for such thing?

I also use the dedicated server for few webpages hosting.. someone PM me if can be used for Renegade Server.

Thanks, Cristian.

There's already enough servers on the list atm and most of them sit empty.

On another note, if all your hosting on that box is a few small websites then its seriously underutilised and your paying out a LOT more than you need to...
