Hey, i'm modding C&C City and first i need to retexture the w3d in 3ds max. So i started doing that and i got stuck.

While i was texturing the road, i has to turn the texture. So, i didnt know how to because i'm not a texturer or anything like that.

Here is a pic of the situation.

sorry, screen resolution

Material Editor - Standard_6

Material Navigation Options Utilities

The Material Editor window features a 4x6 grid of material preview spheres. The top row shows different material types, while the rest are dark grey. To the right of the grid are icons for material properties like color, texture, and shading. Below the grid is a toolbar with icons for material operations. A dropdown menu shows 'Standard_6' and 'W3D'.

Material Pass Count

Current Pass Count:

Pass 1

Vertex Material | Shader | Textures

Stage 0 Texture

Map #56 (cc_road2.dds)

Stage 1 Texture (Detail Texture)

None

you must UVW map the texture

you make that when you click gizmo while select the texture then you can play around with it
