Hey, i'm modding C&C City and first i need to retexture the w3d in 3ds max. So i started doing that and i got stuck.

While i was texturing the road, i has to turn the texture. So, i didnt know how to because i'm not a texturer or anything like that.

Here is a pic of the situation.

sorry, screen resolution

### Material Editor - Standard\_6

Material Navigation Options Utilities

Standard\_6 W3D

Material Pass Count

Current Pass Count: 1 Change

Pass 1

Vertex Material Shader Textures

Stage 0 Texture

Map #56 (cc\_road2.dds) Display

Clamp U Clamp V No LOD

Stage 1 Texture (Detail Texture)

None Display

Clamp U Clamp V No LOD

The Material Editor window displays a grid of material preview spheres. Below the grid, the 'Standard\_6' material is selected. The 'Material Pass Count' section shows 'Current Pass Count: 1'. Under 'Pass 1', the 'Textures' tab is active. 'Stage 0 Texture' is checked, showing 'Map #56 (cc\_road2.dds)' with a 'Display' button and 'Clamp U', 'Clamp V', and 'No LOD' options. 'Stage 1 Texture (Detail Texture)' is unchecked and set to 'None'.

you must UVW map the texture

you make that when you click gizmo while select the texture then you can play around with it

yes he is. he's a starter i think though

he aint even close to how good di3hardnl is lol
