Anyone know where I can get the !b <vehical> or !b <character> or !backup or !backup-tx or !backup-t or !cbackup or have random IA Bots running around the map and be able to choose how many on each team (nod & GDI) and what IA Characters (Soldiers, deadeye, mobious, ect..). And the !as (air strike command). And the highest ranking player have commander powers to call in the !as.

I think theres more, just cant think of all of them right now, I'll edit my post or reply after some one replies.

Please Help! Please and Thankyou!

So, you're trying to get something to function like what we have at St0rm? Hmm.

I'm sure reborn would probably be able to write a plugin for you, but I'm not gonna speak for him soo...Good luck on your quest.

Btw. Our system works off our rank system (proprietary) also, all they do is allow the ranking commander access to call down backup at will (within a certain amount of time). Everything's timed so you can't spam !backup, !cbackup, etc. All the bot does is send a console command, which I scripted, "cinematic <id> <filename.txt>" and it plays a cinematic drop script at the player's location.

I know reborn has my all my console commands I've written (including some non-production ready ones) but can't release them, openly.

I'll see if reborn could write this up for you. If not, try to incorporate it into your bot.

Good luck!

P.S.

The first isn't meant as a flaming/degrading remark so I hope it wasn't taken that way.

Naw I understand. Yeah, but anything that you can link me to anything that has to do with what I asked for in the first post. Or anything thats custom? I just want something similar to what I asked for or what Kamunix/St0rm has. Also Where can i get that !as (call Air Strike Plugin) because I heard its out in the public by 2 people, but you never know, it might be a lie. Please Help! Thanks for your response and Thanks for your future responses. PM me if you want to discuss this in private. Thank you again.

Search these forums. Reborn released his plugins here in the Mod Release Forum.

The Airstrike -script- is his that he wrote (last I checked?).

I'd compile it for you but I don't have a compiler available (I'm not at home, I'm in Florida on vacation). Sorry, but somebody else should be able to do it for you.

Ok, when do you get back? If soon could you please? Thx.

Or anyone out there able to? Or what would I need to compile it? And the instructions how to. Please and Thank you!
