Here's the shaders and stuff he gave me.

Preview

To use these shaders, just extract everything into your Renegade/Data folder, but ALSO extract the .sdb files into your Renegade folder.

Well, that's what I was told by Scrin. Enjoy!

By the way, I'm going to call for all "Yeah look at MY shaders!" posts to be deleted.

Idk what I'm doing wrong, but I extracted everything to the data folder, added the sdb files to my Renegade folder as well. I also have scripts 3.4 with shaders enabled. Anything else that could be affecting it? :/

Extract the "sdb" to the data, not renegadefolder.  
Then it must work

Nice idea, but snow maps, such as C&C\_Alpine...  
OWWW, MY EYES!

I think that speaks for itself.

The only good thing about 'bloom' is that after it blinds you, you may just forget how much it made your Renegade look like ass.

gfx card may not support bloom/shaders?

That's exactly the reason why it don't work.

Knowing your computer as it is, it can't handle anything with high end graphics.

Don't say "high end graphics" when referring to Renegade.

Of course you weren't. But again, you had to get that last little bitch of a comment in just to prove how big of a jackass you really are.

Again thanks for proving my point even further :/

if i would use that bloom, and i move my mouse ingame, i guess that a little 10 minutes later it

finally starts to move because of mouse lag o.o

with a lil bit of bloom my mouse has a delay too lol
