Yep. You can't play the missions using the custom scripts.

Someone else can post how to fix this.

You can download Mission Unlocker from here:

<http://www.cncnz.com/downloads/renegade/utilities/#5>

But I know there is a proper fix for this...I think there was some sort of fix for it I used. Can't remember it as I last played the SP missions in 2007.

By memory the fix was to save and then re-load the game.
