Alright. every time I run the game. and the update rolls. it says "the game is going to restart so the game can update." so when that happens. Ra2 and yuri's stop responding both games and the update goes to 4 MPH.exe than it just says "files content do not match reinstall." I have reinstalled the game 10 times. I even try downloading the 1006 patch manually. and it's still saying the same thing that the file content does not match. and I have run the game in admin mode a lot. Can anyone help me out?

thanks!
