[View Forum Message](#) <> [Reply to Message](#)

I just release it to show crysis how retarded it is to share other peoples work.

Enjoy or not, not sure about this point because the copy is really cheap.

The rar archive has a 1280x1024 and a 1024x768 version.

Download

Yes thats are a part of the settings, but your shaders.dll does not support the buildingbars so this is useless for you.

Hugh72 wrote on Sun, 09 August 2009 19:02do i need a grpahic card support for shaders?
no, cause as far as i know shaders.dll is a part of the 3.4.4 script and the one hes talking about is a modified shaders.dll file, and has nothing to do with shaders support i think, by the way, what graphic card you got? and do you have script 3.4.4?

NVIDIA GeForce 512mb 8500 GT DDR2 also i got script 3.4.4
the nvidia 8400 support shaders (im using it now), so the 8500 is 99% to do, also you can turn shaders on/off ingame in the BHS.DLL menu option

If you don't want it to be released by anyone, then don't give it to anyone... I know there was a precedent that says the contrary when the reborn alpha was leaked, but IMO that situation merited a different approach.

And yes, andrew, I confirm (see PM).

1. u need the map overviews.

U can download it on Deathlink's Website

2. And the Hud.ini have a little bug in it.

try this one:

File Attachments

1) [hud.ini](#), downloaded 137 times
