This is a pretty simple tool to use. I made it simple looking. I like it alot, over the RenegadeIP program. It's was writtin in AHK <http://autohotkey.com> Auto Hotkey Format. Tell me what you think! It took me a while to get it to work. This is my first release on these forums. Which I've been on these forums for at least 2yrs.

Nice Tool, but i use Renegade Resurection as Server Browser.

So i have no use for this Tool.

bumping this, as it seems that XWIS appears to be down but this work for me and some other

people trying to directly connect to servers that are still running and are having problems with using the correct code with the run command line...
