One of the easiest and most hilarious ways to kill infantry when you are in a tank.Any good player can dodge tanks, so running them over isn't always a good idea. Sometimes because of hills and barriers shooting them is a pain in the ass too. So here's whatcha do:Retreat just a little ways, jump out of your vech, and run behind it out of sight.Go into third person mode and wait for the person to run up and try to take the tank.When they are right in front, jump back in and let them run themselves over   I watched as 3 of my teammates fell for this against a light tank. I just didn't have the heart to tell the third (who had watched the first 2) that he wasn't gonna make it
