Well one of my long-in-the-making maps is nearing completion. I have managed to get most of the scripts setup, all that remains is to generate VIS. But currently it doesn't have any tunnels... I am thinking, are they really necessary? I mean, most maps have them, but would people play a map that didn't? It has plenty of high ground that can only be accessed by infantry though, so it won't be all tank warfare. There are a few screenshots below which should give you some idea of the size and style of the map. Just thought that if I want to add tunnels I better do it now so I don't have to redo the VIS later... as it will take some time, being a medium sized map (big, but not cairo big).

So yeh go for it. Ask questions, make suggestions, etc.

piccys

Looks very nice.

Btw I see repairbays I hope you used a new fixed building controller for that? (Since the original one gives that nice electrical current thingy in the middle of the map, which sucks up mines)

If not I can explain how to do it.

Looks very beautiful. Could become a popular map for fan map servers.

It looks nice. But can you show off more of the map itself?

Maybe some landmarks in the field? Just to get a basic feel of how the combat would be.

yeah, somthing like a overview of the map would be cool that shows the bases and distance and routes.

As for tunnels, it's not really needed...it would probably be like C&C Wasteland with most sniping going on outdoors...though that map does have some tiny segment of tunnel.

I think I recall NOD bases in Tiberian Sun being lit by red lights, so what you've done is a nice touch. Keep up the good work!

There aren't any really flash landmarks at present. I made the basic terrain a while ago when I was experimenting in RenX, so I never really knew where I was going with the map lol. but yeah it looks like Tiberian Sun so I was thinking of adding some TS buildings.

Anyone care to make me some?

You can see there is a tunnel near each Refinery, that leads to the tib fields. There is a teleporter in each Refinery also that sends troops to the tib field so they can better defend the harvester - given that harvesting is player controlled.

I would like a server to test it on at some point. At the moment only the bases are setup, need to add a few emitters, crate and weapon spawns, etc, just general junk.

Oh and if you want to see an overview click here
