I Was Wondering If Anyone Still Had This Mod, And If They Could Upload It To File Front, Or Fileplanet, Or Anything Along Those Lines, Because When You Go To The Black Cell ones Doesnt Work.

<http://black-cell.net/downloads/index.php?act=view&id=32> <-- Link Is Broken For The SSGM 2.0.2 Download For The Base Deffences.

The Game-Maps.net One Download's BUT Its Missing The Object.gm File Within The Download.

Err actually, it never came with objects.gm just rebBD.dll and turretpositions.dat(afaik), just put rebBD.dll and turretpositions.dat in your server folder and add rebBD to the plugins list of SSGM.

I started work on it and did use a object.gm mod, I made the readme as I went along and forgot I later didn't need the objects.gm file and was able to make the change in the plug-in itself.
