Except mine simply won't install and I'm not trying to do anything unusual. Tried with and without
UAC, as admin, in 98, xp you fucking name it. Any other suggestions. Td mentioned an alternative
ren installer.

Edit: My freakin' bad, I had no idea what that shit was from the other topic so I googled it. I did get
it installed via that way. AFAIK this seems to be a very isolated incident. Also once I did that, I
could see folders.
