hey guys

i was messing with xwis a couple of days ago, creating new nicks, and then my main nick stopped working

XWIS's message is a 'nick error' and wont show me a server list. I have gone to the xwis site and deleted my nick and some others to ensure im well below the 9 name cap, however its been a few days will not work.

ive written my name in the box and clicked delete account, however when i type the same name i get an invalid pass error when i try to create a new password. i then try with my old password and get the message deleted nick error

anyone know how to fix this so i can play on my original name

thanks

Check this sticky: http://www.renegadeforums.com/index.php?t=msg&th=25764&start=0&rid=4 882 and reset your passwords.

Yes that was the sticky i first looked at

I used the program to reset my passwords, however the nick i wanted to use was not listed there in the box

i took that to mean it was deleted, however when i typed that name into xwis with a new password, i get an invalid password error

After a nick gets deleted, it's gone forever. You cannot register it again.

hmm i was afraid of that

seems weird tho, i mean once its been deleted, why couldnt somebody just create the same name... i dont really understand why that has to be

If I delete my nick, someone else could recreate it...

Olaf and his partner whose name escapes me said that they don't want to spend the time undeleting nicks for everybody.

Nor implementing the damned thing correctly.

i dont mind about any stats or whatnot connected with my nick, its just that i like playing under it. so i dont want it undeleted i just want to be able to recreate it

Goztow - this appears to be the problem, contrary to what you said sumone (including me) cannot seem to recreate my nickname..

What I said was an explanation of why it does NOT work. Xwis doesn't want what I said to happen. Sorry for not being clear.
