Since the Mammoth Tank's barrels don't seem to be included in the DDS it comes with, does anyone know their whereabouts?

Although now I have another question: Does anybody know the sounds used by the Mammoth Tank to fire its shells and missiles? I'm not fussed if its the same sound as something else.

Mammoth_Fire_01 = mammothshot1.wav = mammy shell

gdi_Gunboat_Fire_01 = sam_fire_1.wav = mammy rocket
