Under advanced listings, under speed for all severs the color is red. Then when I enter a game I play for a few minutes then I get a message from the host that states "Setting BW below the defult 120000 is not allowed your BW has been reset to 120000" Then I get kicked out of the game and get a message that states " Connection to server broken please quit"

So thats the problem I have, can anyone help?

enter My Information before entering Advance List, there you can set the speed, or if your downloading, quit it

at the 'Setting BW below the defult 120000 is not allowed your BW has been reset to 120000" just happens to everyone i think

but being kicked im not sure about just check ur connection and if it still messes up buy a new one

it still will say " Connection to server broken please quit"
after i play for a bit. it is a very old cd do u think tht has anything to do with it?

no because if it was the CD the game wouldnt start and the game would freeze

try a different connection
