Have you edited / deleted any of the mission maps (m###.mix)?

Try uninstalling custom scripts.dll (delete scripts.dll, bhs.dll, d3dx8.dll, shaders.dll and then rename scripts2.dll to scripts.dll), it is known to cause problems with some of the mission maps. You will have to re-install custom scripts.dll again afterwards, the official installer will make that quite easy to do.

You should just be able to rename scripts.dll to something like scripts.dll.bak then rename scripts2.dll to scripts.dll. When finished playing single player, just do the reverse.
