For all of those in the skin contest... i would want you guys to make some crazy skins so i can try them out..... im not much of a skinner myself so i would want you guys to do it. Something that would be really cool is...Solid Snake (He is such a bad a\*\*) as a havoc skin James Bond as a havoc skin (hotwire and him would be great together) A Boba Fett skin for the stealth laser rifle black hand (hey it works!) Hopefully you guys can put them in a mod so they all will be visible over the net. I just felt like putting in some suggestions.

The guy who made the Solid Snake skin doesn't know what solid snake looks like, he used Patch as the model and made him blue! That does not pass as Solid Snake! I would like to see a Spawn skin for one of the units, or maybe Tanya for Hotwire.
