Dreganius wrote on Wed, 07 October 2009 00:02Will there be cake?

Yes

Also, great job on the crate.

Subject: Re: Weighted Companion Cube

That is some nice work ^^

Subject: Re: Weighted Companion Cube
Posted by ChewML on Wed, 07 Oct 2009 21:38:33 GMT

It looks nice indeed, but I can't bring myself to use a heart cube in ren... but if someone would make a giant dice, it would even be more fitting as the crates are a gamble... maybe even a fuzzy looking one?

It would take a custom model unfortunately, to make sure all the sides were different... otherwise I'd make it

Thanks all.

Also, the first post was updated with the Standard Storage Cube. It's pretty much the same model, only a lot less lovable.

(Done for the people who are not manly enough to withstand pink, ha.)

Surprised how nice it looks, especially in the shitty old W3D engine. Nice job.

If the w3d engine wasn't fairly buggy and supported more than single CPU threading, it'd be great, since you can do a good lot of shit with the w3d engine.

they use the same the w3d engine in general's i believe or almost the same.

renx is used for generals also.

Except decent physics, shader effects (for now anyway), or using textures larger than 512x512 without major FPS loss.

I attached the gmax and paintshop/photoshop files to the first post. In case anyone wants to edit
the texture or the model.

This is a nice crate slave,

I like to see a smaller version of these crates (half the size.. ?)

1. Open .gmax files (found in source_files.rar)
2. Scale to 50%
3. Export
4. ???
5. Profit
