alot of people have been getting the same error

look at the comments

supposedly ylod is an overheating problem so im hoping it fixes its self

so just be careful if you have a 40 or 60gb ps3 when playing mw2
not sure if ppl who have the slim or 80 gb ps3 are getting the same problem

lol.

Glad to hear Sony are fucking their customers too. With consoles which are just as easily breakable.

Just google for YLOD fix and you'll find a tutorial on how to fix it. You have to open up your PS3

though, so you'll better take it to a local tech support or send it to Sony to get it fixed.

I have a 60gb and the 3.01 update never killed mine! You could still use it as a space heater couldn't you?

I'd beat him and force him to buy a new PS3.

Or just call the insurance company and tell them that it fell in the over by accident.
