<http://new.brenbot.com/>

WOLspy isn't needed if you're using BRenBot 1.52, it has a gamespy broadcaster built in.

<http://brenbot.com/> is inactive because the owner is missing in action or something, I have no idea. <http://new.brenbot.com/> is now the currently used website.

I don't even know where to get WOLSpy let alone how to use it, so I can't help you there.

You do know you DO NOT need WOLSpy if you are using BRenBot, since BRenBot has a built in GSA announcer which is more up to date than the one in WOLSpy.

It was down yesterday because the domain was expired, I guess it's back now.

Strangly enough I actually read the topic three times to check you hadn't said you were not using it... odd how sometimes we can't see what's staring us in the face.

But your SHOUTED and frankly rude response was still uncalled for, a simple 'As previously mentioned I am not using BRenBot anymore' would have sufficed. In fact you didn't need to respond at all if that was the case.

Responses like yours are the reason these forums get a bad reputation, someone posts information which could be helpful and just gets abuse in return.

Don't worry about it and, for my part, I'm sorry for having a go at you about it, I just get wound up

by things sometimes. No hard feelings I hope.
