I got this invalid serial message before the server screen pops up on renegade that big long message board that sayed that it was invalid and i could play with it...

Yes ive been to this post

<http://www.renegadeforums.com/index.php?t=msg&th=20576&start=0&rid=2> 5074

No help i downloaded the ccr serial.exe

and put in my serial and i sayed

"error opening woldata.key for write"

no its not a fake i got it off the back of my

cd case and it has not been used other than my family.

i have played renegade before so i know it is valid and ready for use.

This has not happened before and i hope never again

so if smeone could find and fix the problem

that would be apreciated.

If you need to teamviewer methen just pm

on here and ill tell you my msn .... and then

so far..

Thanks to whoever helps or fixes the problem

Matthew!

Renegade Error?
