This hud was made for a friend so I thought I would release it.
I used many material's from different huds I didn't make any of them. The only thing I did was setup the hud.ini Enjoy.

Looks like a great HUD. However, you need to include the source code tot he modified .dll files you uploaded.

Scrin the only thing i used from your hud was the compass part the other parts was from another fear hud (Canadacdn). Reborn its Campas and Deathlinks Shaders.dll that they released. Also I believe the weapon icons where yours that some released on the forums.

I agree aswell, there is nothing really diffrent that allows you to call the hud 'new' as in copycat.

Still the hud is based on FEAR, not Scrins work. So copyright FEAR would be better then Scrin.

please gtfo all of you.

You should credit the fear dev.
Everything has been based off of something existing.
And this scrin dude has totally no imagination at all, so its not unique.

if you look at the pics nothing matchs scrins gay hud to his fear hud.

and i thought scrin was banned here anyway for giving out hacks so to speak.

right lol.

anyways stop flaming this dude for making a new hud.

It is his it looks nothing like scrins, and rllly if i did something with his hud i wouldn't give him credit just because i don't like him and none of his stuff is copy righted there for i wouldn't have to.

P.S. just because it says copy right scrin 2009 or w/e does not mean he has it patented, so as far as i'm concerned scrin can take his gay skins and fuck off.

Even if it was patened, it's not like you could really be sued or anything... I wouldn't be afraid of breaking copyright laws of a free object, because the worst that would really happen is you get asked to remove it, or get banned. The chances of police finding out and fining you if minute, and the constitution (well, for the united states anyway) says we have the right to sue over anything thats is of a value of \$50 or more (I think, I need to double check on it) so big deal.

now that I'm done with that history lesson, lol, you really should credit Scrin, even if your not sure if it really belongs to him, or if you just don't like him. But one way or another, the hud is pretty cool, but it seams... a little too empty for me. Although, that could be an advantage if you think about it, you can see more around you.

-I feel like this whole post was pointless... lol

lol, it's funny that so many people remake this HUD. The only reason SK made his original HUD with a FEAR style is because I was playing it at the time... It's been 4 years people, think of something original.

Yeah.. I know what you mean.

I'm trying to make something I think is pretty cool though.
WIP:

I'm still not original, tho. =(
