Yes the day is finally there sorry it took so long

I have here for you fully boned and ready to be used ingame the Beta cinematic pistol and the beta automatic shotgun!

First some pics and the files are added in the bottom.
I hope you guys like them!

>The beta cinematic pistol<

The texture quality isnt the best but you guys can expect an update in the future.
This is actually the real w_pist.dds but a bit alterd.

>The Beta Shotgun<

This is the beta shotgun.
As the name states it replaces the shotgun.
It is fully rigged and loaded to kill!

Also the source files will be released lateron in a new big beta package which includes a lot of new fixed up beta goodies!

Thats all for now. Tell me what you think.

There is a file in the .dat that is something like Pistol_fire.wav which is the pistol sound firing, but without a silencer.

True I can also recal another wav file which is used in the mission. Where Locke is saying that you can use your pistol silenced with shift. I think Westwood intended that to be in the game but they kinda skipped it.

That shotgun looks like a grenade launcher from Quake II.

I can see why they did it, it would be pointless anyway...just a waste of coding. Either sound would still trigger the same response from the AI and people can still see where you are coming from with it aswell.

Its the weapon that is from the Pre Released Renegade. Back when the Auto Rifle was held down at the waist.

Nice, but the pistol is too wide/thick

and could non replacements be made for the models?

I don't think its too fat the uvw coordinates where supplied since the original unwarp of the third person model is still available. (In always.dat w_pist.dds if Im correct)

Ah I was wondering where you are Error
I hope you get get your internet back.

EDIT: Yes that could be done Poskov only I dont really find a use for it atm. I could do it but where do you need it for?

Beta shotgun isn't that good, looks like you smashed together the default Ren grenade launcher and the Autorifle from the Sole Survivor mod, bro. The beta pistol's model looks nice, though.

True but thats mainly since I have too little information of the original shotgun.
Especially the back part.
Even the frontpart was a bit of a guess and checking out a lot of old movies and such.

From what I know they have created the Grenadelauncher after the automatic shotgun.
Basically just transforming the model.
I didnt use any meshparts of the Sole Survivor gun only I have used the cliptexture. (Which they are credited for in the readme)

I will see what I can do to get it closer to the original.
Since I can understand what you are saying Canadacdn.

This. I'm almost positive that was a grenade launcher.

This. I'm almost positive that was a grenade launcher.
many said it was a grenade launcher due to its shape

but infact the shotgun is based off the AA-12 shotgun

I'd believe that if it weren't for the fact that there's a couple shells in the cartridge/magazine/whatever that are way too big to be shotgun shells... and, it looks to be as though there'd be 6-8 if all the shells in that thing were in order (which I'm assuming they would be).

I dunno, why would you base a shotgun off an automatic shotgun, then give it only 6-8 shots?

westwood orignally planned this but i guess they removed it due to it being waaaayyyy too realistic

[View Forum Message](#) <> [Reply to Message](#)

I have no clue how many bullets westwood would give to the automatic shotgun. Since its glitched in the movies and just shoots when reloading.

In this movie you will see the autorifle/shotgun in action ->
<http://www.youtube.com/watch?v=IDROF8Qu7AU>

I cannot make anything else than an automatic shotgun out of that.

I love the pistol, even with the slightly fuzzy graphics, but the shotgun? Yeah... thats not a shot gun. (I know there are ones like that, but I'm just joking around)

EDIT: Yes that could be done Poskov only I dont really find a use for it atm. I could do it but where do you need it for?

Mind also making all the beta guns (railgun, rocket launcher) and making them non replacements.

I was thinking of setting up a server where you can play with both the beta guns and standard guns. They'd have different stats so using a beta gun wouldn't be purly cosmetic.
