Is there anyone who can make a patch for the FDS which
removes the CD Auth while the server runs in GSA mode?

When the server is on WOL (XWIS) CDKeys arent checked at all and
people can play just fine. But as soon as you run the server in
GSA mode then people getting booted for invalid cdkeys...
They have the TFD of Renegade and their serials are not in Gayspy
database...

Anyone up for this task maybe?

Thanks, greetz zunnie
