Well basically, my Browser is hijacked.

I use FireFox, but I also have the problem in IE, so its not jus on 1 browser..

I type something into Google ie, bbciplayer, and it redirects me to ad sites or sometimes ebay or yahoo or even dating sites sometimes

I've scanned my system with nod32 anti-virus, malwarebytes, Ad-Aware, Kaspersky anti-virus, spybot s&d, spywaredoctor and avira.. I'm completly at a loss, which is why I'm posting here.

I've had this problem ever since FireFox updated to the latest version 3.6. Before updating to 3.6, I had no prior problems

I've uninstalled FireFox and IE, then reinstalled them..still have the same problem

Any suggestions would be greatly apreciated.

Have you run the immunization in Spybot?

Yeah I did.

I got tired of waiting, so I jus inserted the Windows repair disc to restore my system files, seams to be ok for now..

Edit: Looks like it didn't work...still being hijacked
