That could be the mine that killed an engi entering your buildings.With 5 buildings 5 x 5 mines is 25. Most of times the other 5 are in the pp.

I like to keep mine useage to a min because I dont want to un-mine the base... I just take my time and shot them in the head

How do you plant a c4 on a person? Usually when I try it they never stop twitching, or moving. Usually I just break away fearing they'll see me and peg me up close.I should try it on a "newbie" sniper though, it might be worth something on the entertainment scale.

It works best to get them when they are looking through the scope. I like to c4 them on either team. N   B Snipers are the easy ones. You can tell they are N   BZ because they stand still and don't know your behind them LOL. But in a close up fight with a sniper you can get a kill even if they pop you. Just make sure you throw the c4 before they get a kill. Proxies work too,if you are a tech or hotty, but timed is so sweet. If I'm a stealth I'll ussually give them a little public message like "Tick Tick" followed by "Boom" as the timed goes off. Really ****es them off LOL.

Black hand stealth work well, you can put your timed c4 on the sniper from behind. They can hear the beep though, but its not as if they can disarm the c4 in time. I did get some c4 on the snipers head once, that I must admit was funny! You just need to get away quickly. I do find "walking mines" good for base defence, you need someone willing to stay about the base will a load of c4 on them. Although the mine limit does sort of stop such tactics on most maps.

Why not increase the mine limit?? cuase there are players who... 'over' mine buildings. I've once counted 15 mines in a Tib Refin once. Where the enemie never attacked that building in the game

so it was a waste of mines.This tactic, Although good, Would not work in most case's allot of snipers *Like me* Tend to turn around and look for any enemie around us. And some people use the 3rd person view. But there's also a point where Team Com is needed to like if a eng was heading for you and a team mate saw him. But didn't have time to kill him then how would he warn you??? I've had some of my team mates fire with there pistol or some gun and usaly when a bullet comes close to me I move cause im unsure if its a friendly or enemie.... nor do I want to find out. I think I am how ever well hated in the game by some players. im able to move about and fire and hit someone without even aiming. I even sometimes amaze myself because when im running and I see an enemie at a distence I point to them and Fire and Im guessing but about 78\% of the time I get them in the head. I've always been called for using a cheat. Its not cheating its skill. Skill,Focusing, and waiting.... ever so waiting....   Oops sorry went off topic. Placing mines on someone is fun and scares the hell out of the person who might come up to that Kamakize person. I've had it done to me in a game once where the other team was total noobs and they didn't know how to buy vec's or units. So I was a sniper and the enemie kept on running head long into our base If I remember there where 6 other snipers on my team. At the end of the game and in the beginning of the next the team I was on diceded to tell the other team how to buy stuff... Although all I sead was read the manual... its in there
