I have finished using these and have been meaning to upload them.  
So here

Recoloured and slightly darkened with slightly brighter lights.

GDI:

The lights on the Mammy come from an Arty skin made and released by LeeumDee.

Nod:

The Stank and Arty were made and released by LeeumDee. These ones are just simple recoloured versions.

The light tank skin came from the mix file of "C&C Mutation" Redux. this is again just a recolour and of course the added lights from LeeumDee's Arty skin.

Since the Nod APC is not there here is a good one which I used

<http://www.renegadeforums.com/index.php?t=msg&th=33565&prevloaded=1&rid=23949&start=0>

Enjoy

They look good.

one thing I personally would change is putting the mammys backlight on side fenders and not on the enginevent

Lol, I agree now that you mention it.

I no longer have photoshop to change it now as it's been a while since I made this.

Edit:

Actually now I remember, I was going to put them on the side fenders but the lights will also appear on the front of the Mammy since the texture is used multiple times on different parts of the Mammy model.

Leeums skins are indeed great but I also like your buggy and humvee skin

The light doesn't look too good, maybe you can make an own version

I like the lights, they really finish the vehicles!  
I might check them out
