I have build up some rules for me to estimate or a game is laggy or not.warping ppl:If it happands to me 3 times i leave the game.Wall walking:When it happands to me 5 times i leave.When i get conection to server lost ect. 3 times i leave.When i slide back when standig still (you know)I leave when this happands 4 times.Ofcourse you can decide after how many you leave the game but when you use these rules you can play a nice game.Just keep te count it helps me find nice no lag games You should try it!

Lol!!If any of those things happens once I am out of the room without thinking. Only thing I have a little leniency for is the sliding. I can withstand some sliding here and there but anything else is a sign toi leave the room.

the teleporting and sliding around is fine by me...but that's because I have a 56-crap modem, and I'm not going to get any better. And if the "connection lost" thing pops up, I leave-it doesn't give me any other choice. Feel lucky...others have it worse.

on 56k and can find games without warping/teleporting. The only thing I put up with is stuttering or slowdown, otherwise I bail.

Press F8 then type in; client_physics_optimization 1". This will tell the game to only calculate vehicles you can see, I have found it to reduce lag. Thanks!

Wow, interesting console command. Any other ones that will be just as useful; I only use fps and have very little of an idea what the other ones are.[May 21, 2002: Message edited by: Winsett Z]
