Hey!

I used to play Renegade very actively years ago. I think it was in either 2005 or 2006 when I first started. For roughly the last year, I haven't played much, if at all. I never announced it or "left", but it just happened, and I stopped coming here. As I went through installed Windows 7 Betas, RCs, and eventually, the final, I somewhere along the line didn't even install Renegade anymore.

Last night, I installed it, patched it, added the scripts, added RenGuard, and copied my old skins over, and jumped online. It was either n00bstories or Jelly I joined (pretty sure it was n00bstories), and played about two games. It was alot of fun. It didn't have the magic to drag me back in full time, sadly, but after that, I can say I'll still be playing occasionally and not let it sit and/or uninstall it.

Most may not know or remember me. My in game nick is "H3llian07". I am not a "pro" player, but I am a good one, and at times, a very good one. I "originated" mostly at/from Black-Cell, and when it went inactive and died, I mostly went to Jelly Server before my inactivity set in. I was never in the "in" or "popular" circle in either community (especially the latter since it was bigger and I was there less), but rather sat quietly in the back. When Black-Cell had their clan war against Jelly, I joined in favor of Black-Cell, and didn't use TS or often personally speak with the main Black-Cell group, not during the clan war, nor eve previously, but I always looked at the Black-Cell crew as my family, and I showed it by fighting for them and being one of the top performers for them in that second clan war (albeit we lost), even though I played more at Jelly at the time. I miss Black-Cell (any of you still here and remember this quiet resident of your old server?), and I also miss the magic Renegade used to have, but even in it's current state, it's something no other game is/has, so I'll relish it and play this game while it still lasts (and going on the new official catch phrase above, it could be a long time!). You'll likely see me mostly at n00bstories and Jelly.

I used to play in the black-cell server too, and was a massive fan of theirs. I remember you from that server, I used the handle ren00b, or reb00b or something to that effect.

I too miss the days when BC flourished. I suppose they was a victim of their own good deeds, and

was finally fucked by the a00 non-sense. I see it as a great injustice to them tbh.

i was supposed to be in that com war, i found out at the last minute that i could not play  
  
Black-Cell shouldn't have gone out, i completely agree on that

Renegade just has this absolute fun factor to it. No matter the circumstance, you can always have fun playing Renegade for at least one match.

welcome back to Renegade

as what was said before me, its just a game we all like to play. Always intense, fun, competitive games to be played, both publicly and in commwars/rgct2 (plug lol )

i saw you in Exodus and played a few fun maps with you. Never seen you before but you were a cool guy ingame

hope to see you ingame a bit more!

Yep, I'm open to playing at any servers besides the two I mentioned if there are enough players

(don't like huge games, but don't like four players either). Exodus fill the bill at the time, and I've played there a few times before from what I recall.

I'm itching to play a game or two now, but my main PC is disassembled and in parts since I'm spending a day or two giving it a perhaps unneeded but regular cleaning, and the PC I'm on in the meantime (a Pentium III 1.4GHz, 1GB RAM, GeForce 4 Ti4200) doesn't run it very fast online. Ah, heck, I might just deal with less than perfect and jump online for a game or two after I eat...R315r4z0r wrote on Tue, 11 May 2010 22:20Renegade just has this absolute fun factor to it. No matter the circumstance, you can always have fun playing Renegade for at least one match.Yeah, was hoping I'd get infected with the magic to want to come back to it full time though. Still as much fun when I do fire it up though.

Are you sure that's not a Pentium 4? The Pentium III only commonly went up to 1GHz, or 1.4GHz if you had a rarer Taulatin. Even overclocked, there's no way a Pentium III would run at 2.2GHz for long (unless you meant to type 1.2GHz?).

Renegade is like Perpetual motion. Its boring defensive game mostly, players do whatever they want to. Team work happens rarely ever. It is fun for a 2-3 months.

n00bstories

TLS

Some how I doubt that IronWarrior likes Crimson, but n00bstories is still a decent server, lots of teamplay, pretty full daily. There's always Jelly, atomix, n00bless to play on as well I suppose.

Dude! I remember that name! You, havoc, ccfan, whitdragon, vikki, vloktboky, kamikash,  
BCbaddon, n00binator, dfer, hero, punkun, rtwgnut, dtrngd, dippy, thewall, mylummad, mav, lava,  
loki, falcon30, edecoder, mig29, ionos, then you had all the Kobra clan show up, KobraOps and  
KobraHigh and more, and that's not even counting those there from a long time back before me,  
wow, good times.

---
