Okay, first of all I do not know what happened but when I logged onto Renegade online using the Advanced Game Listings as always, this came up.

I've got no idea what to do, and now I can't play renegade online. Please help ASAP.

They do not normally ban for cheating. That priviledge is normally reserved for page spammers and people that exploit XWIS itself.

PS, I've requested a moderator move. This is the wrong forum.

PPS, This is not a fatal.

Okay, actually it is like not "THAT" Fatal but Renegade is one of my favorite games. For your information, I can't be cheating also because the servers I play is just St0rm which I'm a mod in and John's Build/RPG Server.
