Never seen anything that you did except for that map called, "Four Base" which you never finished... The quality of it was not superb, either.

I'm sure there should be at least some form of punctuation in there.

So you're the "top modder", where's the evidence of this?

lol...

Actually i have seen and heard of him before. I haven't seen any mods or maps but I know he works with cnc_c130drop scripts. I also heard about his drops from a friend which he should know of (TheGunRun aka XXXGunRun) a fellow specialist in drops.

Some examples of his drops from which i heard from GunRun follows:
"He could spawn 100 bots from a single area" (I guess the airstrip didn't get to ask)
"Spawn an orca attached to a gunboat and it could fly, though it was a little unorthadox."
"He applied my invincible text to the mutant ravenshaw script and made them unkillable."
There was more, but I didn't really take in consideration to remember them, becuase it was before I saw this thread (asked him about wilo today wondering why he was saying wilo's stuff was better than his, coincidence eh?)

He also has a site though i haven't been to it in awhile. I have to say he should update with some of his newer works.

Sounds pretty cool what he's been doing, though I assume the reason he hasn't been involved in the public was due to the modding of other games. Though now we should be expecting to see more of him and maybe he will allow of the tryout his drop texts.

So don't hit on him to hard. Lets see what he has to offer us shall we? Although dunno why his spelling is so off maybe english is his 2nd language or something, and he has also given out that he is ready to serve for the modding community.

GunRun made the mod scripts I presented a few days ago, and he says that Wilo's stuff is better than his. I am not sure as I haven't witnessed any of it, but we will see what he can do in due time.

lol look whos back...its Wilost0rm!
for those of you who werent around in uh april i think it was, this guy said he was making a mod called Four Bases that was completely underground, he got the attention of most of the ren forums untill everyone figured out he was a lying piece of shit.

so after that i saw him many times on servers using the beacon exploit to destroy his own buildings.

he also tried to start a site once, and put everyones maps on it without asking for permission, which was quickly shutdown by geocities.

so go away little n00b, you're not wanted here.

He stated he was the "TOP MODDER".

This was why he got the flak that he did, and the fact that he said he was the "TOP MODDER" because a couple of his little buddies said he was.

Well, I have known William, or, more commonly known as wilost0rm for a while now. Sir Phoenix, White dragon, wanna know WHY he can't show you pics? his house was burned down, go to his site it explains it. I have personally witnessed a shitload of his mods, and all I can say is, brilliant. He posseses as much (or maybe more) skill than the original WWS programmers that made the scripts in SP. (if you're wondering what scripts are in SP, its pretty much all computer guided things, like bots, manned vehicles, pretty much everything that can't be put into a map when it's being made) even if he's not the "Top modder" he still is damn good at what he does.

And lets keep the past, in the past shall we?

and also nobody can claim the "Top modder" not ACK, not Laeubi, not even Dante, becuase nobody's perfect with everything. I mean ACK's a whiz when i comes to making maps but Dante beats him with a stick when it comes to scripts, now i mean no offense by this. Might partly be because modeling and modding are 2 differant things (I think, I just need an excuse to flame! Flameanator wants to do something!)

jk

Actually I do think there'd be such a thing as a Top Modder. However it would be differant among people because who the Top Modder is is who each person likes. For one guy it's ACK, for another it's Dante, some even would think it's me (only cause I cram every effect I can, shove it out, and if it doesnt work, i call it a beta, lol jk!) or you! The "Top Modder" to each person is the person they like, modding-wise, for whatever reason.

So there is always a Top Modder, well, almost always.

For me, the top modder would be........weeeeelllll............*takes the Renegade Community, some super glue and duct tape, and puts it all togather*.........whatever you call that, lol.

Will is right, a "friend" of his named reed hates him now, and somehow got ahold of his passowrds for WOL and the forums, and who knows what else. He sometimes hosts games under will's name, then screws peeps over. I have met him twice, and I don't want to meet him again.

So please, if will has offened you, it was most likely reed using will's account

Small question:

If it was your "friend"/arch-evil-completly-bent-on-your-destruction that got IP banned, then you shouldn't you be ok without changing your IP unless the 2 of you are on dynamic IP and under the same ISP.......?

You don't want me to start trying to top him. Cause once I start, I won't stop till a day or so....

Anyhow, use Attach_To_Bone and have the bone set to something like wheelp01 (that's how another guy did it somewhere on here, lol), see the vehicle's w3d file for the list of bones such as the world box and all.
