Well, long story short, i was spamming on Red Alert 2, and I got permanently banned from all XWIS games... Fuckin' stupid, i know, and i'm appealing for unban, but i have other questions.

Renegade is the game that i'm interested in, and when i tried to login to renegade it says my long-time-used nickname was deleted... I'm like ">_>... is that XWIS-Renegade's version of a ban..?" But now i'm thinking, does XWIS even run renegade? They redirect here, their control panel no longer supports renegade, and it seems like there is noone really in charge of renegade. So i'm askin' what the fuck. Is it possible for my serial to have been banned from renegade? I may have to see about deleting all my nicks somehow, or obtaining an unused nick, or ldk what the fuck to do... I just need some info and advice D: And you guys are sure to be atleast 11x faster then the downers at XWIS who perma ban on 6 different games over spamming the Red Alert 2 Lobby.

P.S I'm Sycomoto/Sycopathic if any of you know me as that.~ ;] Sadukar, Scrin, Monkeys, Gr8Climax, Stereo-people~~~

Edit: I didn't explain, on Red Alert, Red Alert2, Tiberian Sun, and C&C1 (I have the first decade so i have all these) my serial's are now blocked. Fucking. Retarded.

Hahahahahahahaha.

If you use Resurrection, you can bypass XWIS and direct connect.

XWIS wide bans are to be taken to strike-team.net

Renegade Server Bans are to be taken to the server's community forums.

If your nickname has been deleted, create a new one, or ask for help on strike-team.net.

This guy just seems like an RA2 noob, let him play. If XWIS cared, they should be browsing these forums to prevent us from helping players bypass their bans.

Since no one actually answered your question let me try to help. First, strike-team does in fact "run" xwis for renegade.

As for your deleted nick you are screwed but it has nothing to do with being banned. For whatever reason strike-team decided that after (an unknown) amount of time your xwis nick would get deleted from their system. They didn't tell anyone nor did they consult with anyone - they just did it. If that wasn't enough they also didn't give you a way to recover a nick once deleted.

tl;dr a deleted nick is there but you can't use it

This explains why my name was deleted. I couldn't make a new name either, because the control panel isn't completed yet for Renegade. Why, Olaf, why?! This is worse than the infantry only release of Reborn.

I think you're forgetting the very first release of Reborn, before the new team took over. Yes I'm talking about the one with two-three working maps, and subterranean units.
