It seems i got a virus when i downloaded tfd patch 1.02 (that adds missing music from the aftermath and counterstrike)
That i also had the virus from when i downloaded the"unable to read senario error patch.

Because of this i dont trust these patches, so is there a way for me to manually install these songs into the RA directory.

Where did you download this patch from?

The 1.03 Revision 4 TFD Patch contains it and more so why not try that? That can be found here.

Hmm thanks for the safe patch
I downloaded it from nygerguds tfd fixes site

EDIT: the reason why i wanted to add my own, was because i wanted some of the songs from other games like journey
