After going to westwood Online/Advanced game listings. my screen tries to connect to server but before I even enter account/password. it doesnt give me a window to enter the account/password. i played before I know how it works. I went to My info toolbar "Manage Accounts" and get "Page failed to load" error. Also everything is disabled in myinfo except connectivity.

Any ideas?

Can this be happening because Xwis is temporarily down for ip/server move?

Or can I be missing something from just reinstalling after a long time...

Thanx for everyones help in advanced.

Also if i try to connect without logging in i get operation timed out

All the old Westwood Online utility pages no longer work. You need to go into the multiplayer menu (Where it lists Westwood Online and GameSpy) and move your mouse to the left to open the tool bar. Click on My Information and there should be a check box to log you in automatically. Uncheck it.

Cmatt think I remember you. Im Sn1p1ng4u. Ok good news. My login box appeared as i just tried it out. Bad news wont let me login with my old account. Probably because it wasnt made on this serial Number. Anyway i can fix that? I'd like to have my old rank and stats back

[Edit] Forgot a letter in my password to make it 8 letters long. Sorry for draggin on the topic. I have the gamer list now ...
