so i found out the other day that there was a newer c&c out so i decided to get it because i have been playing since the old worldwide warfare games and i was so pissed. basically just threw \$40 out the window. so i decided to start back up my renegade account and can not get it to work. i have downloaded the renguard and it still wont work. any help? Are there any other newer games that are similar to renegade?

Renguard is useless now.

make sure you have the latest patches and scripts 3.4.4  
and alot of the Multiplayer servers are down due to xwis being down.

All servers will be up shortly

If you got the game the other day and you don't like it then just go and return it to the video store, 40 bucks just flew in your window.
