Hello,

I have connect to Westwood online and advanced listings, I do have a account but cant remember the password, and also the new account button doesn't work as it leads me to a in-game error message saying 'Page failed to load or is Invalid'

Any way of solving this? ((this happened after that server update)).

Thanks in advance.

David

Well the create new account button feature no longer works after WOL was defunct and replaced with XWIS

Read the stickies, please. However, if that doesn't apply because you've logged in since the XWIS transition a few years ago, it might be this.

Westwood Online (XWIS) was offline for maintenance at the time of this post, so you may try again now. Should work fine.
