Little video I put together at the end of '09 and I just wanted to get some kind of input here before I go into the long process of editing/sorting clips for another video. I realize the community is shrinking and watching clips of Rene may not be that interesting but I've found that I do kind of enjoy the process. I'm not that great at it obviously but I want to know what kind of tips you guys could give me about this video and video editing in general as I recently upgraded to SonyVegas 9.0.

Negative posts are welcome (of course)as they seem to help me improve most, but a critique is more of what I'm looking for.

Also, if you have excess time on your hands feel free to check out my other videos and do the same as they are videos of some of the fun we've had over the years.

So in case you misunderstood this is SOLELY for some guidance and advice on what you see.

Thanks for your time

Not bad sir; I liked the music. It gave it a more epic feel. Gotta say also that you did pretty well for 37 FPS while sniping.

I used to play with 60, however since getting a new graphics card - I can get 300~ FPS in a sniper server. Point being that I think It would take some time to adjust to playing with a lower FPS, GJ.

Uh, like fuck it doesn't.

Mouse is a lot more responsive with 300 FPS then 60 FPS. If you have a PC that is capable of getting 300 FPS (no big deal) in a sniper server, go snipe and see the responsiveness of your mouse in there. After that, go join a 40/40 AOW Server and try and snipe with <60 FPS. You will notice a huge difference.

http://www.youtube.com/watch?v=npWhHQpdD1Y

It's still here ^

Youtube didn't take it down...so maybe you need to use a proxy to view it because one dude said it didn't allow him to see some videos on Youtube. I don't know.
