Im a bit bored of leveledit atm but i still got a map laying here which i would like to see finished.

It is an island idea and the mission is supposed to be played as Soviets.

There should be 3 Hind Helipads and 2 Chinook Helipads and some silo's maybe (the vehicle versions).

The gmax file, w3d's and scripts.dll are all uploaded here:

Is anyone interested in setting it up as a Co-op map?

xD

Thats what you need for apb's leveledit (although it says 9935 it is also for Nuclear Winter APB)

It does require some registry edits but thats it.

Installing APB Editor does not in any way conflict with Renegade.

Let me know when you got it, come on irc and i'll guide you through and give you all the files you need
