Sorry but i cant find a real download for Cloudyserv at all.
All i find are the updates for the older version. But not the real version with the mirc.exe. Cause it tells me its not compatible if i download mlRC.

Didn't think people still use it. I haven't updated those in forever. At least, publically...

I have 2 sets now, 1 specifically for RR and one for Non-RR. And that GSA fix is outdated.
