Subject: Missing game.exe
Posted by Tupolev TU-95 Bear on Sun, 03 Oct 2010 20:36:26 GMT

Well today is not my day...
I just had a trojan (sorted)
But when AVG deleted the trojan (that infected the game.exe) and i want to run i end up with

C:\Program Files (x86)\EA Games\Command & Conquer The Firs

Windows cannot find 'C:\Program Files (x86)\EA Games\C
Decade\Command & Conquer Renegade(tm)\Renegade\R
the name correctly, and then try again.

Yeah, when it finds an infection, it just gets rid of the whole file. I'll attach my Renegade.exe in a zip archive.

Hmm, you might actually want to scratch that. It seems mine is infected, too:
http://virscan.org/report/d335658125a2c003bb600833ad21734d.html

Odd.

If i get a game.exe from someone, it wont render my account with invalid serial right?

And whoa you got a worm? Thats very odd
EDIT: it seems your .exe is infected by the same trojan thats infected mine.

If you read the message you will see it says it cant find RENEADE.exe, not game.exe.

renegade.exe is a launcher for game.exe, so your game.exe is probably still there, you just need to edit your shortcut to point to that instead of renegade.exe.

Whoops my bad didnt read there
Hmm it seemed that there was a game2 in my memory stick when i was backing up renegade, will that help?

game2.exe is the copy of game.exe created when you install RenGuard and is the original game.exe. If you have a game.exe and a game2.exe then game.exe is RenGuard and game2.exe is Renegade.
