Problem: Your installed version of westwood online is incompatible with this version of Renegade

Possible Cause: Installing RA2 after Renegade, even with a different internet folder.

Solution: regsvr32 WOLAPI.dll & WOLBROWSER.dll

regsvr32 doesnt work for WOLAPI.dll in Windows 7, does anyone know how to register files that DO register in Windows XP, but not in Win7?

Ahh figured it out. Got a program that uses regsvr32 and ran in compatibility mode, must use regsvr32 in compatibility mode.
