Subject: Is there any easy way to bring a CD Renegade install "up to par" with a TFD v1.03 one?

I have two different installations of C&C Renegade on two different computers. One was installed from an original CD, but the other is on TFD unofficial version 1.03. This doesn't create any real problems in and of itself, but it's obvious that the TFD 1.03 version is a bit more up-to-date than the original CD one. It has some files (such as bhs.dll) that the older installation doesn't.

In short, is there a simple, straight-forward way to update an original CD install to match TFD v1.03?

Thanks in advance for any help.

Secret thingieA link to a nearly identical post on http://forums.commandandconquer.com!
A really big secret thingie that no one could ever figure out on their own(^Made by me^)

Check the Renegade reinstall sticky. I suppose tfd 1.03 includes scripts 3.4.4 and/or maybe core patch 2.

TFD 1.03 might have scripts 3.4.4, but I'm not so sure about Core Patch 2. It also has "_AI" variations of the official maps (w/ bots) that CP2 doesn't seem to have.

You can just copy paste .mix files in the data directory.
