I am going to install Renegade for my young friend who just got it. I know there is alot of cussing done and I was wondering if there was a way to block that? Also, would it block all cuss words or just some? Thanks

Yes you can filter them out.

Options > Multiplay

check out bad language filter

EDIT: dunno, i belive they filter out the common bad lang.

In a world where "circumference" is "bad language".

My younger brother once got banned for a day or something from the really old Renegade chatrooms by HelpBot because he was telling someone to be "carefuk" (missed the L by one key) about what they said or they could get chat banned. Good times.

The language filters work? I always thought they were just for show... because they never did anything regardless if they were on or off.

Same here, it never did a thing for me. Even for the obvious ones.

bradley, you are by all means a terrible friend.

What are you thinking??? What is going through your head???

FORGET cussing and bad words, that's the least of your worries! If you let your friend play this game, he will be actively involved in virtual warfare. Virtual offensive statements are the least of your worries now. He will be actively KILLING, DESTROYING AND BLOWING UP OTHER PLAYERS!

This game is rated M for mature, so if you can't take being called a fucking faggot gook-loving shit-eating butto-loving loser, you should walk away (or grow some balls)!

What you need to do is set your friend up with the Sims, or something along these lines.

Thanks

edit: lol! if only i had a penny for every constructive statement i came up with!

Boomer, its actually rated "T" but I still approve that message.

@language filter, it never worked AFAIK (go and type fuck in all char in any server you'll see what I mean).

Well you have two options:

- 1: Go to Jelly servers. Assuming they're still there. I haven't been here in a while.
 - 2: Play single-player.
-
