Hello. About a year ago or so I made a server-side version of M10, but then I got this huge computer virus and I had to get almost everything wiped of my computer. I've finally decided to remake the map but I've run into a bit of a problem. One of the things that I did in the map was that I used one of the things under object>simple>mission specific and switched its W3D file to that of a building and then placed it on the map. I remember I had a folder of W3D files of all the buildings, but I don't remember where to download them again. Anyone know? I know there's ftp.westwood.com but when I downloaded them they were all gmax files.
