Does anyone know where I can find the taunts for renegade? The ones used with the numbers keypad, such as the roundhouse kick, dance, salute, bow ect.

You need scripts 2.1 or newer and you need keys.cfg in your data folder.

Download the scripts 3.4.4 installer from: http://ren.game-maps.net/index.php?act=view&id=828

Then download keys.cfg from: http://www.mediafire.com/?0mbjmcck1ef3ggf and place it in your Renegade/Data folder. There are some other useful keys defined in that file so I recommend opening the file with a text editor and taking a look at the keys in there.

How could one bind the F1 key to chat history again?
