lol, I am making a list of things you shouldn't do while playing renegade. The first thing in this list is the most important in my eyes. 1) Don't get out of your vehicle 2) Don't go crazy with proxy c4, use it WISELY in your base 3) Don't use standard riflemen to destroy tanks, it just won't work 4) Don't use mummies frequently if they are being destroyed quickly, they award the enemy too many points for their destruction 5) Don't try to be a Renegade, despite the title. Work on a team and you will win 6) If you are a sniper, don't stay in scope mode for too long. Check to make sure you are clear every now and then, otherwise somebody might decide to c4 your ass. Add more as you please

7. Don't Start typing when an enemy is in front of you. ( I have seen that happen - He then said i was "Cheating" ) 8. Do not give opponents the taste of the "Blue Ray of Death" 9. Do not stand still when in close combast with a Sniper, or when a Sniper is Aiming at you. 10. Do not assume that just because a Tank containing a Stealth Black Hand is killed, that the SBH is dead. So, do not immediately repair your vech. If you see NO driver, presume there is a SBH in the area. ( A trick I use, when the tank is at 50HP under tank fire, I get out....and 8/10 times, I can nab an enemy tank. )

-do NOT keep your vehicle in exact center of a tiberium patch screaming "I need repairs"-do NOT stand at a purchase screen for more than 15 seconds!-do NOT stop your apc in the middle of a rush to run over the sniper (even though he can do a whopping 5 points of damage to you).

Don't steal your teammates tank unless he is repairing it and you're holding it so it doesn't get nabbed by enemy. It's bad manners! If C4 mines start disappearing while you're laying them, STOP!!! you reached the limit Da\*\*it.LOL

- don't go around buying unnecessary vehicles cause you find yourself a sugardaddy. Ask if people need any. (Except for in a game full of noobs where tanks are needed on the battlefield but aren't being bought by the noobs) [ August 06, 2002, 03:26: Message edited by: [K4T] Justifier (B&D) NL ]

Don't spam "I need repairs" over and over and over. It gets annoying. If you're not near an engine then give your location or head closer to base.

nice one kirby Anyway...-----3. Don't use standard riflemen to destroy tanks. Use standard riflemen to annoy tanks and rack up some points for credits. Shooting a tank with a rifle infantry gets you over a point a second, and a tank killing a rifleman gets him 3 points, so the rifleman gets more efficiency than the tank does.-----this is NOT what I meant. I meant that you don't use standard riflemen to DESTROY the tanks. And besides, going for points is not a good idea when facing tanks, especially when they pose a big threat to your base and team.

-Don't set beacons in your own base!!! If you lose your connection or get kicked, the beacon will hurt your team. -Don't try to get in a vehicle unless there is a green arrow above it. -If an enemy character takes your tank, do not call them a tank thief.

- Do not press F2 and discuss tactics. Seriously, i was in this game the other day and this guy said "We need to get them! Right everyone get flamers and go in the back way!" Hey may have pressed F2 by mistake though.- Don't take on Light, Medium, Flame, Stealth and Mammoth tanks as a Sniper- Do not step in the enchanting glowing green stuff! (Tiberian)

- In a close game DO NOT Ion/Nuke the other team's base repeatedly if they are sitting on defense and keep disarming them. They will beat you in points from this.- If you have a team pinned down in their base do not keep rushing with Mammies in hopes to get a lot of points or destroy thier buildings. They will beat you with points by contnually destroying your Mammies and repairing their buildings.- On Hourglass sit in the middle of the Tiberian patch with an Arty. Engies cannot reach you there. You will go boom!- Do an engie rush and then place and detonate a remote C4 while the rest of your teammates are setting their C4 on the MCT. Wait for them all to back up or you will kill them too.

"an engie rush and then place and detonate a remote C4 while the rest of your teammates are setting their C4 on the MCT. Wait for them all to back up or you will kill them too"Unless friendly fire is on, your own C4 can only kill you, not your teammates.

-Do not try to steal your enemies tank when they are in it.(some noobs kept trying to steal my tank cuz I was standing still looking round and instead they killed themselves.....hmm wonder if they saw a "green arrow" lol)-Do not try to take out base defenses as a sniper(ive seen many team messages asking why I shot the AGT or OB with all my ammo as a sniper and it didn't get damaged?)-Do not place c4 on ur team(sorry but when where kicking the others team ass I have fun loading up my guys with c4.....scares the other team when they see them loaded with c4 but it is a good tactic it doesnt kill them only there enemy if they are surrounded)-Do not take on and Orca/Apache as an engee.....just saw some retards doing it like 2 minutes ago hmmm i love noobs

Helpful things you should do.....-when being buggy rushed early in the game and you can't buy a tech. or a hotwire... simply stand at the pt with a regular free unit with the c4 on.... continually place and refill your supply of timed c4's laying them all around the MCT.... if you time it right you can get about a 25 to 30 second window of timed c4's exploding near the MCT of a building that is likely to be rushed-when you find yourself about to die under the treads of a tank... do not just throw your c4 (timed) on the side of the enemy tank... for if they are an engi. or a tech/hotwire... they can get out and difuse it.... the best way to place the c4 is by throwing it on top of the enemy tank-on hourglass staying at the top and using arties is not a good idea... yes you can be killed even if you are up there with engis. snipers and well placed timed c4's can take you out... camping on hour glass is very difficult and is best done when all units stay in front of the AGT or the Ob. and simply kill all rushing units-Don't underestimate the power of a flame thrower as it may not have good range but 3 flame throwers can quickly destroy an enemy building if all three are firing at the MCT with support from 1-2 riflemen and or shotgunners-Don't buy buggies on large maps where units have the ability to meet you at a central position... such is the case on the map Under... where buggies and humvee's alike can be taken out with a single riflemen, shotgunner, or flametrooper-When attacking an enemybase wait for the right opportunity to present itself before rushing.... do not rush in while the enemy base is bunkered with all 20 opposing players in the base... also avoid creeping ahead... as this will result in a bottle neck where any and all shots fired by enemy units will find a target.... keep back and spread your force out sparingly... such that units are not too far apart to result in an inability of concentration fire but yet are far enough apart such that opposing units have to aim-About to die? throw the timed c4 even if there is no close target.. you might get lucky and catch someone in the blast radius when it goes off-Can't see the stealth units?... get skins which allow you to see the glow from the stealth unit when it get's hit from frendly fire or enemy fire... a neon blue hue works best as this will allow you to see it in both lit and unlit spaces on maps-Don't use helicopters when the game is about to end and the enemy has no barracks/HON or has no Warfac./Airstrip... as this will result in rushing of the enemy base by helicopters whose drives now feel free to rush the base not fearing enemy units.... This is one of the dumbest things to do... the armor of all types of flying vehicles is very low and can be easily taken down by even on riflemen.... I have had many games lost due to newbs using helicopters and not strafing and moving around while shooting as well as thinking that they are invincible now that the enemy is weakened-Don't hold your fire if youre in a tank... firing at random can help you to decloak a stealth unit by shooting at walls and the ground in front of you ,should you be able to get them in the blast radius of the explosion you will be able to see the light refraction their stealth suit makes.. I have been able to get many kills just by shooting at seemingly empty spaces on maps-Lock your camera to the gun of vehicles... this will allow you to

not only shoot in 360 degree circle around you but also can allow you to shoot at one thing and run over enemy units at the same time.... should you be a good driver... this has been very helpful to me not just the turret but the ability to drive a tank well... giving me in all likelihood the best kill/death ratio in one game in all the world at 114:1-despite what people think having a few players who go off on their own is a good thing as this will net your team surprising results... not only can one unit get lots done but it will also take the attention away from the main fighting force.... as a result of my style of playing many renegade players have come to resent my style of playing... and yes I do admit I go overboard on yelling at people.... but I highly doubt anyone can criticize my ability to give the team chances... do not put down or flame people who like to go off on their own.... many good things can come from people acting on their own...

C4 i totally agree on the last suggestion about goin off.its true if you send one or two snipers to go off and eliminate a bunch of oncomers and distract there attention to you ....you can send a force the opposite way.....there fore you killing t he other team and having an open gate to their base....but beware it doesnt always work lolbye

Quote:-Can't see the stealth units?... get skins which allow you to see the glow from the stealth unit when it get's hit from frendly fire or enemy fire... a neon blue hue works best as this will allow you to see it in both lit and unlit spaces on maps lolz i use skins all the time so i can see the enemie, rainbow colored stealth affect, all gdi vechs light blue, all nod vechs bright pink, all snipers changing rainbow colors, glowing mines, all sorts of stuff, it helps a lot. another thing i always do that is good is this: turn spawnies on, pickup several spawn weapons then go get a refill

at a pt, all ammo will be full. also if you are a sniper, with a reg. sniper, pick up a siper rifle and it will give you to, with a total of 72 shots.

1 Don't be a jackass when you see c4 on one of your buildings and it is in critical condition but you refuse to change into tech/hottie/engie to defuse because you are a stealth and instead you spend 10 secs telling your team to defuse the c4 I guess you shouldn't change if your hand/barracks is gone, but other times do it.

1. use BOTH of your hands when playing, prefrably one on the keyboard and one on the mouse...2. don't ask your enemy for tactics (iv seen that)3. do have your screen turned ON to get most joy out of the game.4. Red = Nod , Yellow = Gdi, why can't newbs ever seem to learn that... 5. yes, that big metal thing 5 feet infront of you is a tank... yes you should step away...6. don't be to drunk while playing, okey i know the ground shakes when arty's fire, but should the grund really shake during a sniper game?...

---
