hey,

someone knows how to show to current ingame players in the servername?

few years ago i saw it in the wol/xwis listing

looks like: ~ Server xyz AOW (xx/20) ~

Do you mean you want the players to be listed in that empty box below?

XWIS/WOL dont show the Gamespy players, so i want to show the players in the servername (bGametitle)

screenshot: xwis show 10/32 players but 32/32 connectet

I wrote something simple that runs inside a dedicated thread and every 5 seconds updates the player list like that. It grabs the actual name of the server and saves it, then appends (%d/%d) to it so it looks like:

SERVER_NAME (CURRENT_PLAYERS/MAX_PLAYERS)

as shown in the attached screenshot. With my GameSpy plugin you can set it so GameSpy broadcasts a custom game title for your server different from the one you set for WOL, so the player count doesn't show up in the title of your server on GSA.

Here's the code and how to use it if you want to have it as an SSGM plugin:

```
plugin.cpp includes:
void Plugin Load() {
CreateThread(NULL, NULL, Set_Player_Count_Game_Title, NULL, NULL, NULL);
}
DWORD WINAPI Set_Player_Count_Game_Title(LPVOID params)
 const char* ServerName = WideCharToChar(The Game()->GameTitle.Peek Buffer());
char tmp[128];
for (;;)
 memset(tmp, 0x0, 128);
 sprintf(tmp, "%s (%d/%d)", ServerName, The_Game()->CurrentPlayers,
The Game()->MaxPlayers):
 const wchar_t *Data = CharToWideChar(tmp);
 The_Game()->GameTitle = Data;
 delete []Data;
 Sleep(5000);
delete []ServerName;
return 0:
}
And inside plugin.h include:
DWORD WINAPI Set Player Count Game Title(LPVOID params);
