SHOULD BE PLAYED ON A TT SERVER

Date: Sat 24th of September

Time: 8 PM UK time, 9 PM Dutch time, 3 PM Whiskey time (I think, can someone confirm please?)

Server: we'll try to get a TT server

The idea is that this can be used both as a TT testing and community war. I'll also arrange a spare server, just in case.

Opponent: Jelly

Maps: ideas are welcome, I'd like at least one fanmap in, if Jelly agrees.

You need to join teamspeak at [ts3.thekoss2.org](http://ts3.thekoss2.org) to be allowed to play (no need to talk, but at least you need to listen in)

We ask all players to use the TT scripts 4.0 beta for general testing purposes

Yeah, nudge me before cw and I should be there.

No need for tinfoil hat:

```
<script src="http://www.google-analytics.com/urchin.js" type="text/javascript">
</script>
<script type="text/javascript">
_uacct = "UA-305710-4";
urchinTracker();
</script>
```

There's the culprit.

Since it's played on a TT server and the BETA is released, why not add the TT client as a requirement aswell?

too late to have everyone get 4.0 and TT

we might have to do a lobby war instead because both sides are dwindling  
wait until we can get hypnose and spermy and SoQGirth to play and we'll redo this like a legit game

i'll most likely be here before the start but gone during the setup, so i'll try to get things moving on

the jelly end  
which server we using?
