I ran across this tactic on feild the other day, i was nod and my whole team was running around in the tunnels, so i decided to stealth out in the feild, when i tank rolled out onto the feild i c4ed it from behind{to make sure it didnt see me} after it went across the bridge i opend fire, it fired back and so on, by the time i died it was at half health and then bang! med tank gone, this cost me 400 and him 800. I kept doing this to tanks in the feild over and over again, i even got a mammoth tank once{he didnt know i was firing on him from behind}

This Stealth guy tried that today on Hourglass map, hanging out on left side stealth mode.I used Third person view while I was helping tanks (hotwire). I saw him 2 times when he shimmered and got him both times. dont try to stealth if Im around LOL.
